
3 QUESTIONS

to ask before hiring a **WEBSITE DESIGNER**

PAUL BURNER, SLIDE ARTS GRAHPIC DESIGN

3 QUESTIONS to ask before hiring a **WEBSITE DESIGNER**

1

CAN I EASILY MAKE EDITS TO MY WEBSITE ONCE IT IS DONE?

We build websites with you in mind.

At Slide Arts we build our websites on the WordPress platform. A free web-based interface allowing you to make changes to your website quickly and easily. Our experience has led us to use the most current and intuitive page editors within WordPress making it a breeze for you to make changes to your site. And, we'll personally train you on how to do it.

2

DO YOU CHARGE MONTHLY MAINTENANCE FEES?

Options based on YOUR needs.

Websites need two types of attention; maintenance and updates. **Timely maintenance** is required to keep your website secure from hackers and malware and to keep your site running smoothly and efficiently. A slow or broken website will have customers looking elsewhere. The content and message on your site will require **updates** as your business changes and grows. We are here to assist you with either area and will configure a plan that meets YOUR requirements. We will never try to sell you on something you don't need.

3

DO I OWN MY WEBSITE, DOMAIN NAME AND HOSTING?

Do you have full control and access to your website accounts?

Many web design companies will group their clients onto one hosting account. By doing this grouping they can make more profit, but won't allow you access to your account make changes to simple things like email passwords. We think this is bad business. You should have access to make the changes you want to make. At Slide Arts we give you ownership of all accounts, and we are always here to assist if needed. The choice is always yours.

THERE IS A SOLUTION!
